

Quality Assurance for Your Wind Power Investment

Independent. Impartial.

Protect the Value of Your Investment On-Site

The most critical stage of your wind power plant (WPP) investment is the installation and commissioning of turbines. A professional and independent inspection during this phase ensures the long-term success and financial return of your project. Even the smallest overlooked detail can result in significant future costs.

Hidden Defects and Risks

Manufacturing and assembly-related micro-cracks, loose bolt connections, and structural defects in towers and blades pose serious risks that shorten turbine lifespan and lead to unexpected failures.

Contractual Risks

Incomplete or faulty deliveries may cause disputes during 'Provisional and Final Acceptance' procedures, preventing your project from being completed on time and within budget.

SOLUTION: QWIND Independent Installation and Commissioning Inspection

QWIND is a quality control and consultancy firm established solely to protect the interests of investors, operating 100% independently from manufacturers. Acting as your technical strength at every stage of installation, we ensure that you receive the full value of your investment.

OUR SERVICES: Comprehensive Inspections that Secure Your Investment

1. Post-Installation Quality Control

From foundation and tower connections to all mechanical and electrical components inside the nacelle, we inspect compliance with contractual requirements and engineering standards.

2. Inspection During Installation

Providing proactive control at every stage of the project, ensuring immediate correction of errors and timely project progress.

INTERNATIONAL EXPERIENCE: OUR REFERENCES

At QWIND, we have conducted full-time quality control inspections of leading turbine technologies in Türkiye, Sweden, and Poland for over 8 years. Our work has helped eliminate numerous quality issues. This experience has equipped us with the ability to understand and address challenges unique to different sites and turbine types.

Don't Leave Your Investment to Chance.

Avoid risks during plant acceptance procedures. Unlock the true potential of your investment and secure your revenue—contact us today.

We operate in Europe, the Middle East, North Africa, the Arabian Peninsula, and the Turkic countries.
